

50+ years of wireline innovation.

Better products.
Better service.
Better performance.

Take a deeper look at your wireline partner

The value of your wireline investment becomes clear when you see the caliber of the people backing it. For more than 50 years, Camesa Wireline has been a trusted leader in wireline for the oil and gas industry. From our legacy EMC products to next-generation innovations, our global inventory of industry-leading wireline products gives you the options and reliable performance you need to handle any challenge or geology around the world.

For more than 50
years, Camesa
Wireline has been
a trusted leader in
wireline for the oil
and gas industry.

Solutions for any challenge

Cased- or open-hole, high-tension or sour service, greaseless or conventional — wherever you work and whatever your needs, Camesa offers the widest range of wireline solutions to meet your job's demands.

Performance-driven technology

Camesa is constantly developing next-gen wireline solutions to help our clients thrive in increasingly demanding environments — today and tomorrow. With products like our EcoSeal® greaseless EMC and our X3™ Slickline, we're defying the status quo and redefining what's possible in challenging and unconventional plays.

Reliable, high-performance wireline for any application

Camesa understands the intense demands facing today's oil and gas companies. That's why we work directly alongside our customers to optimize our conventional wireline products and develop next-gen solutions to solve new and emerging challenges.

EMC

Camesa offers a best-in-industry EMC selection, including cased- and open-hole options as well as multi- and mono-conductor cable to suit the unique demands of your job environment.

Mechanical

Camesa's mechanical wireline selection includes both conventional Swabline and Dycam options as well as next-gen X3™ Slickline for improved performance in demanding environments.

High Tension

Our DuraSlam line of high-tension EMC is specifically designed for deep-water environments and features fortified polymer core technology to ensure communication stability during critical logging operations.

Fiber Optic

Camesa offers a full selection of reliable, high-performance fiber optic cables for production logging with DTS and DAS.

Geothermal

Our GeoSteam™ line of geothermal EMC feature industry-leading high-temperature insulators to allow logging operations in geothermal steam environments.

Sour Service

Camesa's sour service suite of products are made of corrosion-resistant alloy steel suitable for H₂S and CO₂ environments.

EcoSeal[®] greaseless EMC

Camesa has been setting the industry standard for high-quality electromechanical cable for decades, and now we're taking our legacy of innovation into a new era.

In addition to our industry-leading open hole, cased hole, sour service, geothermal, and fiber optic EMC options, Camesa is proud to announce the latest evolution of EcoSeal, our signature greaseless EMC.

Designed specifically for long, highly deviated, and horizontal wireline interventions, Camesa has engineered the latest evolution of EcoSeal to deliver more performance, efficiency, and reliability with less non-productive time.

Industry-leading polymer jacket

Our inside-out polymer-filled cable manufacturing process enables a cable jacket that reduces friction by up to 40%* and enables greaseless pressure control with unlimited running speeds.

Zero-torque design

The enhanced EcoSeal armor package eliminates NPT from loose, broken, or high wire and drastically reduces cable crush incidents.

No new equipment necessary

High electrical capacity means the same tools you use to run conventional wireline will work with EcoSeal.

* Compared to conventional wireline.

What makes Camesa the ideal partner

Industry-leading expertise and support

The benefits of working with Camesa aren't confined to the cable on the drum. Our commitment to quality and reliability are matched only by our dedication to our customers. When you use Camesa wireline, you gain access to a team of experts dedicated to your success.

Unsurpassed quality control

Every piece of wireline that leaves our doors is electrically and mechanically tested to ensure that it meets or exceeds catalog specifications.

Reliable global inventory

Our customers work around the world and so do we. Camesa's industry-leading wireline selection is available at service centers globally, allowing you to keep up with demanding schedules wherever your job takes you.

Camesa Cable School

To ensure that our clients get the most from their wireline investment, we offer proprietary Cable School training free with your purchase. Led by instructors with deep operational experience, this one-of-a-kind program offers one-on-one, onsite training structured to make your operations more efficient, decrease cable-related NPT, and reduce your overall operating cost.

Camesa mobile app

To help you simplify complex, in-field decisions, Camesa offers a mobile app with helpful tools and calculators that help keep your team moving.

Think performance.
Think productivity.
Think Camesa.
